

# Print Emulsion CATALOG SHEET

## Fujifilm Crystal Archive Type II

### Product Information:

This new RA-4 silver halide color paper is designed to produce high-quality color prints, optimized for digital printers. In addition to the many superb features of the predecessor-- Fujicolor Crystal Archive Paper Type One, Fujicolor Crystal Archive Paper Type II incorporates a new silver halide emulsion technology, coupler technology and layer design technology to deliver enhanced color reproduction, white purity, image stability and processing tolerance. When used in conjunction with the newly developed Frontier 550/570 Digital Lab System, it allows for Prints in Minutes performance -- super-fast processing, which results in a dramatic improvement in productivity.

PAPER SIZE	ROLLS/CASE	GLOSSY	LUSTRE	MATTE
3.5 X 610	4	832000	832001	832002
4 X 275	4	832003	832004	832005
4 X 610	2	932006	932007	832008
4 X 775	2	932009		832011
5 X 275	4	832012	832013	832014
