

Print Emulsion CATALOG SHEET

Fujifilm Crystal Archive Super Type PD

Product Information:

Fujicolor Crystal Archive Super Type PD is our newest evolution to Fujifilm's family of professional portrait color paper. Improving our renowned Crystal Archive Paper technologies, print output results in more accurate color reproduction, more accurate whites, plus improved highlight detail. Consistently high-quality custom wedding and portrait prints are a result your customers will appreciate.

Improved lab handling characteristics make this RA-4 paper easy to use in the lab, and Crystal Archive image stability continues to assure your customer's wedding and portrait prints will withstand the test of time with unparalleled print permanence.
