

ChemBrik

Prepress Powder Chemistry For Automatic Mixing System

DESCRIPTION

ChemBrik Powder Chemistry is formulated to provide the optimum performance conditions for all papers and films. Because it's dry and vacuum-packed, it's easy to use with a shelf life that is virtually unlimited. It is computer-measured during manufacturing for 24/7 processing consistency. Processing efficiency that assures

Our Automatic Mixing System consists of one developer tank and one fixer tank which does it all automatically. You get accurate, consistently mixed solutions that give superior photographic performance every time. Both save you money while preserving our environment.

FEATURES

- Dry, vacuum-packed, and easy to use.
- Processing consistency and efficiency.
- Waste-free chemical integrity.
- Low replenishment rate that reduces consumption and effluent.
- Long-term stability.

ORDERING INFORMATION

ChemBrik BT Developer	3 x 20L	892116	All Hard Dot Films except Fuji HQ
ChemBrik RA Developer	6 x 20L	892322	All Rapid Access Films and Papers

ChemBrik RA Fixer	3 x 20L	892323	General Purpose Rapid Access Fixer
ChemBrik Imagesetter Fixer	3 x 20L	892404	General Purpose Fixer with Hardener for Films and Papers

DIRECTIONS

Push the start button for the Automatic Mixing System, and it fills with exactly the right amount of water. Open and add the fresh, dry chemicals. Simply press the button again, and the system mixes at the factory-set time for perfect results! When the chemistry supply is running low, an alarm sounds to alert you to mix again.

TECHNICAL DATA

20 Liter capacity 22 pounds – 26" x 8.5" x 16"
 40 Liter capacity 36 pounds – 33" x 9.5" x 17"
 Trolley: Rolling stand holds two 20L or two 40L tanks
 Power: 110V grounded electrical outlet
