

PressMax® 34ARS Fountain Additive

A Non-HAPs Alcohol Substitute for Sheetfed Presses With Continuous Dampening System

PRODUCT DESCRIPTION

PressMax 34ARS Fountain Additive has proven to be effective at eliminating alcohol on presses equipped with continuous dampening systems. PressMax 34ARS offers a number of unique features compared to traditional alcohol substitutes. It offers a wide ink/water balance window more like alcohol and is easy to run. It is safe for “unbaked” CTP plates and contains no “HAPS” solvents, both of which can be important in today’s modern print shop.

FEATURES

- Minimizes adjustments - tends to compensate for the effects of alcohol.
- Provides variable wetting - as more is used, greater surface tension reduction will occur.
- Safe for “unbaked” CTP plates.
- Non-HAPS!
- Best choice for UV and new “hybrid” inks.

INSTRUCTIONS FOR USE

To replace alcohol and achieve the desired level of wetting power, add 2 to 4 ounces of PressMax 34ARS Fountain Additive to the press-ready fountain solution. PressMax 34ARS will not alter conductivity readings.

TECHNICAL DATA

VOC	5.0 lbs./gallon
Glycol ether solvents	41 % by weight
Dosage	2 to 3 oz./gallon

PRESS-READY SOLUTION

Dilution	3 oz./gallon in RO water
Conductivity	No change
Surface Tension	30-32 dynes/cm.

ORDERING INFORMATION

Catalog Number	Size
890389	4 x 1 gallon
890544	2 x 2.5 gallon
890380	5 gallon pail
890381	55 gallon drum
